

# Product Information

## Aquamarine Edible Glitter, 8 mesh F290090

### Description:

Edible Glitter is used to decorate food items in the rich, shimmering colors that appeal to people of all ages. A quick, easy sprinkle creates a dazzling explosion of colors. In any application, Edible Glitter will create a look that stands out and makes an impact.

### Advantages:

The quick and easy way to decorate products • can be used to create random splashes of color or create a design appropriate for holidays or everyday decorating • gives food a new, more appealing look that commands consumer attention • differentiates a product and makes it stand out in a consumer's mind • creates a special look without adding high calories • creates valuable new sales opportunities as it increases appeal • adds that finishing touch to food products.

### Use and Applications:

Applications for this product are almost unlimited. Edible Glitter can be used to add color and decoration on a wide variety of food products. Sprinkle it on top of frosting to decorate cakes, cupcakes, cookies, pastries or ice cream. Glitter adds color to doughnuts and brownies. Sprinkle swirl it into hot cereals to add fun to breakfast for children or let them add a sparkling dash of magic pixie dust to any of their ordinary foods to make it their favorite food. Many applications can also be found in decorating candies and confections. This section is only meant to suggest a few of the imaginative uses for Edible Glitter. Flavors can also be added according to a customer's application or needs.

**It is the responsibility of the end user to determine the suitability of the product for the intended use and compliance with local and appropriate regulations.**
